Part 6H: FedDetect Anomaly Notification for FedACH Services Request Form

*Required Fields

Section 1: Service Description and Form Instructions

FedDetect Anomaly Notification for FedACH Services (FedDetect Anomaly Notification) is intended to detect and notify a financial institution of its FedACH activity that may be anomalous based on the financial institution's enabled criteria and either the financial institution's own historical activity or when compared to industry/operating rule metrics. These analytical results can be used by the financial institution to help with risk mitigation and to manage operational processes that are specifically within its control, subject to the terms and conditions on use and disclosure of information applicable to FedDetect Anomaly Notification in the Reserve Banks' Operating Circular 4.

FedDetect Anomaly Notification is accessed and administered online through FedACH Information Services in the FedLine Web[®] Solution or FedLine Advantage[®] Solution. If each of your institution's subscribing RTNs will access and administer the FedDetect Anomaly Notification using its own electronic connection, then your institution does not need to complete a Part 6H Request Form.

If your financial institution is unable to administer FedDetect Anomaly Notification online, the Part 6H Request Form may be used to instruct the Reserve Banks to enable or disable selected use case criteria and associated contacts on behalf of your institution.

When you submit this form, the submitted form supersedes any previous versions of the same form.

For detailed instructions on completing this agreement, please refer to the [Participation Agreement Instructions](#) located at FRBServices.org.

3.2 Use Case Enablement

The Reserve Banks have identified certain FedDetect Anomaly Notification use cases. Selected use cases will be enabled on behalf of your institution. Once established, management of the use cases remains with your institution, and you can modify or delete use cases at any time through FedACH Information Services on FedLine Web or by submitting a new Part 6H Request Form.

<p>NOC Monitoring Notifies your ODFI when the same correction or change (NOC) is received more than once outside of the prescribed Nacha change timeframe, indicating that your Originator may not be making required updates.</p> <p>Same Day Debit Large Dollar Variance Notifies your RDFI when high dollar debit batch totals from the 4:45 p.m. ET transmission deadline are outside of historical norms, helping to ensure awareness for any funding action.</p> <p>Micro-Entry Forward Monitoring Notifies your ODFI when Originators using small dollar entries for account verification purposes experience unusual forward volume activity, potentially indicating fraudulent activity.</p> <p>Micro-Entry Return Monitoring Notifies your ODFI when Originators using small dollar entries for account verification purposes experience unusual return volume activity, potentially indicating fraudulent activity.</p>
