### **Federal Reserve Bank Services begin support for Microsoft® Internet Explorer® v9.0**

Effective November 15, 2011, the Federal Reserve Banks will begin supporting Microsoft Internet Explorer v9.0 for use with the FedLine Web® and FedLine Advantage® access solutions. Other supported browser versions include Internet Explorer v6.0, Internet Explorer v7.0 and Internet Explorer v8.0. This change is aligned with the Federal Reserve Banks' commitment to remain current with the technology available in the marketplace.

As a reminder, personal computers used to access Federal Reserve Bank Services via FedLine Advantage and FedLine Web access solutions must comply with minimum hardware and software requirements. Financial institutions should review the latest hardware and software requirements for FedLine Web and FedLine Advantage and work with their IT departments to ensure compliance with these requirements.
