In determining whether a Funds Participant is subject to these requirements, the Reserve Banks may consider the aggregate value, ~~the~~ aggregate volume, or ~~the~~ purpose of payment orders sent and received by that Funds Participant.
- 16.6 Each Funds Participant shall test its ability to access and use or continue to ~~use and~~ access and use the Fedwire Funds Service before it or its Service Provider first uses the Fedwire Funds Service or make changes to their ~~operations,~~ hardware, ~~or~~ software, data transmission capabilities, or operations that might affect the Funds Participant's ability to continue to ~~use and~~ access and use the

Fedwire Funds Service. 18.0 SERVICE PROVIDERS

18.1 A Fedwire Participant may authorize another entity to act as its Service Provider by executing and submitting to the Appropriate Reserve Bank Staff the agreement in the form shown in Appendix C to this operating circular. A Fedwire Participant must use ~~the such~~ agreement ~~in Appendix C to this operating circular~~ even if it is establishing the Service Provider relationship for contingency purposes only, and even if the Service Provider is affiliated with the Fedwire Participant. ~~Until the agreement in Appendix C to this operating circular is received by the Appropriate Reserve Bank, a Fedwire Participant may not use a Service Provider.~~ A Fedwire Participant's authorization of the Service Provider is effective no earlier than the business day following the business day that the Appropriate Reserve Bank Staff receives the fully executed agreement in the form shown in Appendix C to this operating circular.

~~18.1~~**18.2** Until the agreement in Appendix C to this operating circular is received by

the Appropriate Reserve Bank, a Fedwire Participant may not use a Service Provider until (i) the Appropriate Reserve Bank Staff receives a fully executed agreement in the form shown in Appendix C to this operating circular, (ii) the Fedwire Participant and Service Provider complete any testing required by the Reserve Banks under section 16 of this operating circular or section 14 of Operating Circular 7, and (iii) the Fedwire Participant provides any information requested by the Reserve Banks about its intended use of the Service Provider. The Reserve Banks may refuse to allow a Fedwire Participant to use a Service Provider or place restrictions on a Fedwire Participant's use of a Service Provider for any reason.

~~18.2~~**18.3** By executing the agreement in the form shown in Appendix C to this operating circular, a Fedwire Participant (i) authorizes a Service Provider to act on its behalf under this operating circular (including its appendices), (ii) designates the Service Provider as its agent for accessing Reserve Bank systems for sending or receiving Messages or Securities ~~Transfers~~Messages, (iii) authorizes the Service Provider to select which security procedures (described in section 2 of Appendix A to ~~the Reserve Banks'~~ Operating Circular 5, ~~Electronic Access~~) to use to access Reserve Bank systems, and (iv) authorizes the Reserve Banks to act upon information and instructions of the Service Provider with respect to that Fedwire Participant.

~~18.3~~**18.4** Any Message or Securities ~~Transfer~~Message initiated by, transmitted by or through, or received by or through a Service Provider is as fully authorized and effective a Message or Securities ~~Transfer~~Message as if it were initiated, transmitted, or received by the Fedwire Participant.

~~18.4~~**18.5** A Message or Securities ~~Transfer~~Message is sent to a Reserve Bank when it is transmitted to the Fedwire Funds Service or the Fedwire Securities Service by the Service Provider. It is the responsibility of the Fedwire Participant and its Service Provider to implement appropriate security controls to protect any information that flows between the Fedwire Participant and the Service Provider. By authorizing a Service Provider to act on its behalf, a Fedwire Participant agrees that (i) its Service Provider may be granted credentials identifying the Service Provider as authorized to access the Fedwire Funds Service and/or Fedwire Securities Service; (ii) its Service Provider may use those credentials to act on behalf of the Fedwire Participant; and (iii) at the option of its Service Provider, the Service Provider may use the same credentials to access the Fedwire Funds Service and/or Fedwire Securities Service on behalf of other Fedwire Participants that have designated the Service Provider to act on their behalf.

~~18.5~~**18.6** By authorizing a Service Provider to act on its behalf, a Fedwire Participant agrees that (i) the Reserve Banks may establish an Electronic Connection with the Service Provider for its use in sending and receiving Messages and/or Securities ~~Transfers~~Messages on the Fedwire Participant's behalf, and (ii) the Service Provider may use the same Electronic Connection to send and receive Messages and/or Securities ~~Transfers~~Messages on behalf of other Fedwire Participants that have designated the Service Provider to act on their behalf.

The Reserve Banks are not required to take, and will not take, any measures to ensure that the Fedwire Participant's Messages and/or Securities ~~Transfers~~ Messages are properly identified or segregated by the Service Provider.

~~18.7~~18.8 By authorizing a Service Provider to act on its behalf, a Fedwire Participant designates the Service Provider as the proper place for sending Messages and/or Securities ~~Transfers~~ Messages ~~and other advices and notices~~. Unless the Fedwire Participant intends to use the Service Provider for contingency purposes only, a Reserve Bank properly executes a payment order ~~as stated in section 11.3 of this operating circular~~ if it sends an Advice of Credit representing the payment order to the Service Provider. If a Fedwire Participant has informed the Appropriate Reserve Bank Staff that it intends to use its Service Provider for contingency purposes only, the Reserve Bank may send Messages and/or Securities ~~Transfers~~ Messages, ~~and other advices and notices~~ to the Fedwire Participant or the Service Provider.

~~18.8~~18.9 A Message or Securities ~~Transfer~~ Message initiated, transmitted, or received by a Service Provider or sent over an Electronic Connection managed by a Service Provider is subject to this operating circular or ~~the Reserve Banks' Operating Circular 7, Book-Entry Securities Account Maintenance and Transfer Services~~, as appropriate, and any other relevant Reserve Bank operating circulars, as well as any policy or regulation of the Board of Governors of the Federal Reserve System with respect to the wire transfer of funds, book-entry securities, electronic access, and payments system risk.

It is the responsibility of the Fedwire Participant to ensure that its Service Provider complies with the Fedwire Participant's obligations under this operating circular (including its appendices) and the terms of any separate operating circular or agreement governing a particular Reserve Bank service. Notwithstanding the use of a Service Provider, the Fedwire Participant retains full responsibility for management of its Master Account with respect to both its intraday and overnight positions. Any overdraft incurred in that Master Account is a binding obligation of the Fedwire Participant to ~~the~~ its Administrative Reserve Bank ~~on whose books the Master Account is maintained~~.

~~18.11~~18.12 A Message or Securities ~~Transfer~~ Message initiated by, transmitted by or through or received by or through a Service Provider constitutes the initiation or receipt of the Message or Securities ~~Transfer~~ Message by the Fedwire Participant for purposes of authorizing the Reserve Bank to debit or credit the Master Account or Securities Account (as defined in Operating Circular 7), as

the case may be.

18.13 To effect any actions that the Reserve Banks may take to terminate or restrict a Fedwire Participant's access to the Fedwire Funds Service or Fedwire Securities Service under section 9 of this operating circular, section 5 of Appendix A to or section 7.1 of Operating Circular 5, or section 8 of Operating Circular 7, the Reserve Banks may instruct a Service Provider to terminate or restrict the Fedwire Participant's use of an Electronic Connection managed by the Service Provider. 18.14 The Reserve Banks may share information relating to a Fedwire Participant, including how it uses or accesses the Fedwire Funds Service or Fedwire Securities Service, with its Service Provider. Each Service Provider shall maintain and keep current a list of all Fedwire Participants for which it acts as a Service Provider and the services that it provides to such Fedwire Participants. At a minimum, such list shall describe for each Fedwire Participant the (i) types of Messages or Securities Messages that the Service Provider initiates, transmits, or receives on behalf of the Fedwire Participant and (ii) Electronic Connections managed by the Service Provider used to send or receive Messages or Securities Messages on behalf of the Fedwire Participant. Upon request of the Reserve Banks, the Service Provider shall provide such list to the Reserve Banks.

~~18.12~~18.15 The Fedwire Participant and the Service Provider shall each indemnify and hold the Reserve Banks harmless against any claim, loss, cost, or expense (including, but not limited to, attorneys' fees and expenses of litigation) ~~resulting that arise~~ from (i) the designation or use of that Service Provider by the Fedwire Participant ~~or~~, (ii) the acts or omissions of the Fedwire Participant or ~~the that~~ Service Provider (or any of their agents) other than for any claim, loss, cost, or expense arising solely ~~out of from~~ a Reserve Bank's failure to exercise ordinary care or ~~to~~ act in good faith, ~~or~~ (iii) the Fedwire Participant's failure to submit a fully executed agreement in the form shown in Appendix C to this operating circular.

2.0 APPLICABILITY; PRECEDENCE

2.1 This appendix applies to all Funds Participants, regardless of whether they are Protracted Outage Participants, if the Reserve Banks declare a Protracted Outage. If the Reserve Banks declare a Protracted Outage, Protracted Outage Participants may send payment orders and may receive Advices of Credit, in each case in accordance with the Protracted Outage Procedures. During a Protracted Outage, (i) the Reserve Banks will be able to process only a limited number of Critical Payment Orders among a subset of Funds Participants designated as Protracted Outage Participants, (ii) Funds Participants that are not Protracted Outage Participants will be unable to send or receive Messages, and (iii) the Reserve Banks will not be able to process Offline Messages as they normally would.

2.2 Operating Circular 6 (including its other appendixes) applies to Messages, including Critical Payment Orders, sent and received during a Protracted Outage. To the extent that this appendix expressly sets forth terms that differ from other provisions of Operating Circular 6 (including its other appendixes), the terms of this appendix apply.

3.0 DESIGNATION OF PROTRACTED OUTAGE PARTICIPANTS, SYSTEMICALLY IMPORTANT PAYMENT ACTIVITIES, SUBMISSION TIMES, AND DOLLAR LIMITS; NOTICE OF A PROTRACTED OUTAGE; STATUS OF CRITICAL PAYMENT ORDERS

3.1 The Reserve Banks may designate Funds Participants to be Protracted Outage Participants or Limited Protracted Outage Participants or remove such designations, in each case from time to time, by (i) providing each affected Funds Participant with notice, in writing or electronically, of its status and (ii) updating the Protracted Outage Directory.

3.2 The Reserve Banks may designate Systemically Important Payment Activities for which Protracted Outage Participants may send and receive Critical Payment Orders from time to time by defining such Systemically Important Payment Activities in the Protracted Outage Toolkit.

3.3 The Reserve Banks may designate one or more Submission Limits, one or more Submission Windows, one or more Submission Window Cutoffs, one or more Dollar Limits, and the hours of the Protracted Outage Business Day, in each case from time to time, by specifying them in the Protracted Outage Toolkit or by providing the Protracted Outage Participants notice of them during a Protracted Outage in accordance with the Protracted Outage Procedures. The Submission Limits, Submission Windows, Submission Window Cutoffs, and Dollar Limits the Reserve Banks designate for Limited Protracted Outage Participants may differ from those applicable to other Protracted Outage Participants.

3.4 If a contingency event occurs and the Reserve Banks determine to use the Protracted Outage Procedures, the Reserve Banks shall provide Protracted Outage Participants with notice declaring a Protracted Outage in accordance with the Protracted Outage Procedures.

4.0 SENDING CRITICAL PAYMENT ORDERS; RECEIVING ADVICES OF CREDIT; COMMUNICATIONS GENERALLY DURING A PROTRACTED OUTAGE

4.1 A Protracted Outage Participant that sends a Critical Payment Order during a Protracted Outage shall comply with the Protracted Outage Procedures and authorizes the Protracted Outage Participant's Administrative Reserve Bank to accept the Critical Payment Order in accordance with the Protracted Outage Procedures.

4.2 Any Critical Payment Order sent by a Protracted Outage Participant must meet the following requirements:

4.2.1. it must identify as the Fedwire Funds Service receiver another Protracted Outage Participant listed in the Protracted Outage Directory or, in the case of a Limited Protracted Outage Participant, an Issuer;

4.2.2. it must meet the format specifications in the Protracted Outage Procedures established by the Reserve Banks for Critical Payment Orders;

4.2.3. it must be intended to settle Systemically Important Payment Activities;

4.2.4. it must not cause the Protracted Outage Participant to exceed a Submission Limit or Dollar Limit; and

4.2.5. it must not be sent outside the Submission Window.

4.3 The Reserve Banks are not responsible for identifying whether a Critical Payment Order complies with the restrictions described in section 4.2, and a Protracted Outage Participant authorizes its Administrative Reserve Bank to accept a Critical Payment Order even if it does not comply with these restrictions.

4.4 Acceptance by a Reserve Bank of a Critical Payment Order occurs at the time a Reserve Bank, in accordance with the Protracted Outage Security Procedure, confirms to the Protracted Outage Participant that it successfully verified every Critical Payment Order the Reserve Bank received in a single Critical Payment Order File. If a Reserve Bank rejects some Critical Payment Orders in a Critical Payment Order File or if it agrees to cancel fewer than all the Critical Payment Orders in a Critical Payment Order File, then acceptance by that Reserve Bank occurs at the time the Reserve Bank confirms to the Protracted Outage Participant that it successfully verified the other (i.e., those neither rejected nor canceled) Critical Payment Orders in that Critical Payment Order File.

4.5 During a Protracted Outage, the Reserve Banks shall deliver Advices of Credit after each Submission Window in accordance with the Protracted Outage Procedures. The Reserve Banks shall also deliver an activity report at the close of each Protracted Outage Business Day that reflects all Critical Payment Orders received from and Advices of Credit sent to each Protracted Outage Participant.

4.6 To help ensure that Protracted Outage Participants are able to send and receive communications to and from the Reserve Banks in accordance with the Protracted Outage Procedures, including communications to send, verify, or cancel Critical Payment Orders and to receive Advices of Credit and activity reports, each Protracted Outage Participant shall (i) have authorized persons available who are properly trained and have access to all information necessary to send and receive communications contemplated under the Protracted Outage Procedures and (ii) establish the capability to send and receive communications through the channels identified by the Reserve Banks in the Protracted Outage Procedures. The Reserve Banks are not responsible if a Protracted Outage Participant is unable to send or receive communications in accordance with the Protracted Outage Procedures, including communications to send, verify, or cancel Critical Payment Orders or to receive Advices of Credit or activity reports, because it does not have authorized persons available or is unable to use the communication channels identified by the Reserve Banks. The Reserve Banks may require persons authorized by each Protracted Outage Participant to confirm periodically that they can access the channels identified by the Reserve Banks in the Protracted Outage Procedures.

5.0 PAYMENT BY AND TO A RESERVE BANK; USE OF FUNDS

5.1 Payment by a Protracted Outage Participant to a Reserve Bank and by a Reserve Bank to a Protracted Outage Participant (or in the case of a Limited Protracted Outage Participant, an Issuer) for the amount of a Critical Payment

Order occurs at the time the Reserve Bank orally confirms to the Protracted Outage Participant that sent the Critical Payment Order that the Reserve Bank has processed the Critical Payment Order.

- 5.2 Payment under this section 5 is final and irrevocable regardless of whether the Reserve Banks can effect related accounting entries in the Master Accounts of the sending or receiving Protracted Outage Participants (or in the case of a Limited Protracted Outage Participants, a receiving Issuer) at the time of settlement. The Reserve Banks will endeavor to make all such accounting entries to Protracted Outage Participants' (and Issuers') Master Accounts before the next Fedwire Funds Service Funds Transfer Business Day but have no obligation to do so.
- 5.3 The Reserve Banks' records are conclusive as to the timing of acceptance and payment of each Critical Payment Order.
- 5.4 During a Protracted Outage, a Protracted Outage Participant may use funds that are credited to its Master Account as payment for a Critical Payment Order to settle other Critical Payment Orders. A Protracted Outage Participant might be unable to use such funds for other purposes, including to settle activity generated through other Reserve Bank financial services, until such funds are reflected in relevant Reserve Bank applications. Reserve Bank applications may not reflect current balances in a Protracted Outage Participant's Master Account and the Fedwire Funds Service may not reflect Messages the Protracted Outage Participant has sent or received until the Reserve Banks have resumed normal processing of Messages and have reconciled Messages that were processed before or during the Protracted Outage.

6.0 REJECTIONS OF CRITICAL PAYMENT ORDERS

- 6.1 A Reserve Bank may reject a Critical Payment Order for any reason, including but not limited to circumstances in which:
- 6.1.1. the Critical Payment Order is sent to a Reserve Bank outside a Submission Window;
 - 6.1.2. the Critical Payment Order does not identify as the Fedwire Funds Service receiver a Protracted Outage Participant listed in the Protracted Outage Directory, or in the case of a Limited Protracted Outage Participant, an Issuer;
 - 6.1.3. the Critical Payment Order exceeds a Submission Limit or Dollar Limit;
 - 6.1.4. the Critical Payment Order does not comply with format specifications in the Protracted Outage Procedures established by the Reserve Banks for Critical Payment Orders;
 - 6.1.5. a Reserve Bank determines that processing a Critical Payment Order could expose the Reserve Bank to an unacceptable level of credit risk or breach an overdraft limit applicable to the sending Protracted Outage Participant; or

6.1.6. a Reserve Bank is unable to complete the Protracted Outage Security Procedures for a Critical Payment Order.

6.2 If a Reserve Bank rejects a Critical Payment Order, the Reserve Bank may accept or reject all other Critical Payment Orders contained in the same Critical Payment Order File.

6.3 Unless otherwise agreed in writing by a Reserve Bank, during a Protracted Outage the Reserve Banks reject all payment orders that are transmitted to the Reserve Banks that are not submitted in accordance with the Protracted Outage Procedures. Each Funds Participant waives notice by any Reserve Bank of any such rejection. In addition, Funds Participants understand that payment orders and other Messages they sent to Reserve Banks through the Fedwire Funds Service and/or the Reserve Banks' online communication channels before the Protracted Outage may continue to process when the Reserve Banks return to normal operations. Funds Participants may not cancel or modify these payment orders or other Messages.

7.0 CANCELLATION AND AMENDMENT OF CRITICAL PAYMENT ORDER

7.1 Unless otherwise agreed in writing by a Reserve Bank and subject to section 7.2,

7.1.1. no request by a Protracted Outage Participant to cancel a Critical Payment Order during a Protracted Outage is effective to cancel the Critical Payment Order unless the request is verified through the Protracted Outage Security Procedures;

7.1.2. the Reserve Bank will treat a Protracted Outage Participant's request to cancel a Critical Payment Order during a Protracted Outage as a request to cancel all Critical Payment Orders contained in the same Critical Payment Order File; and

7.1.3. no request by a Protracted Outage Participant to amend a Critical Payment Order is effective to amend the Critical Payment Order.

7.2 A Reserve Bank is not obligated to cancel a Critical Payment Order after a Reserve Bank has accepted it.

8.0 PROTRACTED OUTAGE SECURITY PROCEDURES

8.1 The Reserve Banks shall include the Protracted Outage Security Procedures in the Protracted Outage Procedures, which the Reserve Banks shall make available to Protracted Outage Participants in the Protracted Outage Toolkit. The Reserve Banks may amend the Protracted Outage Security Procedures from time to time by making available to Protracted Outage Participants a revision of the Protracted Outage Procedures. Amendments to the Protracted Outage Security Procedures are effective at the time described in section 9.2.3.

8.2 The Reserve Banks may offer optional features of the Protracted Outage Security Procedures. If a Protracted Outage Participant chooses not to adopt an optional feature, the Protracted Outage Participant rejects a version of the Protracted Outage Security Procedures that includes the optional feature.

8.3 The Protracted Outage Security Procedures are Offline Security Procedures as identified in Appendix A to Operating Circular 6. As with other Offline Security Procedures, the Protracted Outage Security Procedures involve use of an identity code or other security code sent by an employee of the sender, and the names and contact information of persons authorized by the Protracted Outage Participant to send and verify payment orders, and include use of a callback or listen-back procedure by a Reserve Bank.

9.0 NOTICES; MAINTENANCE AND AMENDMENT OF PROTRACTED OUTAGE TOOLKIT

9.1 NOTICES BY RESERVE BANKS

9.1.1. Notices and other information provided by the Reserve Banks in connection with a Protracted Outage shall be delivered to each Protracted Outage Participant as described in the Protracted Outage Procedures using the contact information provided by the Protracted Outage Participants in accordance with section 19.2 of Operating Circular 6.

9.2 MAINTENANCE AND AMENDMENT OF PROTRACTED OUTAGE TOOLKIT

9.2.1. The Reserve Banks shall make the Protracted Outage Toolkit available to each Protracted Outage Participant via the method identified by the Reserve Banks in the Protracted Outage Procedures.

9.2.2. Each Protracted Outage Participant shall maintain current versions of each component of the Protracted Outage Toolkit. In complying with this obligation, each Protracted Outage Participant may rely on the description of each component that is included in the Protracted Outage Procedures to identify the individual components.

9.2.3. The Reserve Banks may amend from time to time any component of the Protracted Outage Toolkit. The Reserve Banks shall make any such amendment available to Protracted Outage Participants via the method identified by the Reserve Banks in the Protracted Outage Procedures. The Reserve Banks shall endeavor to provide each Protracted Outage Participant with prior notice of an amendment.

10.0 LIABILITY

10.1 RESERVE BANK LIABILITY

10.1.1. Except as expressly provided in this appendix, the Reserve Banks are not liable for any damages other than those payable under subpart B of Regulation J. In no event is a Reserve Bank liable for any special or consequential damages, even if such damages were foreseeable or the Reserve Bank had been informed of the possibility of such damages.

10.1.2. The Reserve Banks are not liable to any person for their acts or omissions in (i) declaring a Protracted Outage, designating Protracted Outage Participants or Limited Protracted Outage Participants,

designating Systemically Important Payment Activities, or designating Submission Limits, Submission Windows, Submission Window Cutoffs, Dollar Limits, or the hours of the Protracted Outage Business Day, or (ii) limiting the functionality or features of the Fedwire Funds Service, including as described in this appendix, for the duration of a Protracted Outage.

10.1.3. The Reserve Banks assume no responsibility or liability to a Protracted Outage Participant with respect to the Protracted Outage Participant's compliance or risk-management obligations, including those relating to anti-money laundering, antiterrorist financing, fraud, customer identification programs, data security and data privacy, economic sanctions, and consumer protections.

10.1.4. The Reserve Banks are not responsible for monitoring Master Account balances to prevent Protracted Outage Participants from overdrawing their Master Accounts or breaching their overdraft limits.

10.1.5. The Reserve Banks are not responsible for identifying errors in Critical Payment Orders.

10.2 PROTRACTED OUTAGE PARTICIPANT LIABILITY

10.2.1. Nothing in this appendix limits the liability of a Protracted Outage Participant under this operating circular, including its other appendixes, or under subpart B of Regulation J.

An FPM Customer may enable and modify these processing options within one or more Service Units, and if enabled, each will apply to Messages created, modified, or verified through the Service Unit within which the processing option is enabled.

- 6.2 FedPayments Manager also offers each FPM Customer the capability to enable certain processing options for [Offline](#) Messages the FPM Customer sends [to the Fedwire Funds Service by telephone](#) ~~Offline or~~ [for Online Messages it sends to the Fedwire Funds Service](#) through the FedLine Direct access solution by extending the processing options enabled within a Service Unit by the FPM Customer as described in section 6.1 [of this appendix](#). An FPM Customer may only extend those processing options through a single Service Unit; if it does so, those processing options will apply to all Messages sent to the Fedwire Funds Service by the FPM Customer ~~Offline or through the FedLine Direct access solution~~ [using those methods](#).

- 6.2.1 If FedPayments Manager is unavailable, processing options enabled by an FPM Customer in accordance with section 6.2 [of this appendix](#) will continue to apply to Messages the FPM Customer sends [to the Fedwire Funds Service using the methods described in that section](#) ~~Offline or~~

~~through the FedLine Direct access solution.~~ The Reserve Banks may reject Messages that violate a processing option enabled by an FPM Customer even if the FPM Customer desires but is unable to modify its processing options because FedPayments Manager is unavailable.

- 6.3** Each FPM Customer is solely responsible for choosing the options that are best suited, in its judgment, to its funds-transfer business and risk tolerance. For certain processing options, the Reserve Banks may establish default settings. Each FPM Customer shall review and determine whether the default settings are appropriate and shall modify them if they are not. The Reserve Banks may require an FPM Customer to perform testing before making certain options available.
- 6.4** Use of certain processing options may preclude an FPM Customer's ability to release Messages from FedPayments Manager to the Fedwire Funds Service. The Reserve Banks have no liability if an FPM Customer is unable to release a Message to the Fedwire Funds Service for processing because of the processing option settings in FedPayments Manager, whether selected by the FPM Customer or left unchanged from the default settings established by the Reserve Banks.
- 6.5** Subject to certain restrictions (such as when the Reserve Banks impose testing requirements before certain options become available or such as the restrictions described in section 10.0 [of this appendix](#)), FPM Customers may change their processing options at any time when FedPayments Manager is available. Changes to processing options ~~will~~ take effect immediately.
- 6.6** Consistent with section ~~4~~[2.5 of this appendix](#), each FPM Customer must have staff with the appropriate access roles available to enable or modify the FPM Customer's processing options. The Reserve Banks are not liable if an FPM Customer cannot enable or modify its processing options because the FPM Customer does not have such staff available.
- 6.7** The Reserve Banks anticipate that each FPM Customer will need to change its processing options from time to time based on its funds-transfer business and risk tolerance. The Reserve Banks assume no responsibility for monitoring how an FPM Customer uses (or fails to use) the processing options that are available to it in FedPayments Manager or for monitoring how an FPM Customer modifies its processing options.
- 6.8** The Reserve Banks may provide warnings in FedPayments Manager if an FPM Customer has not enabled certain processing options. These warnings are provided solely as a convenience for FPM Customers. The Reserve Banks are not liable for the absence of warnings for other processing options.

7.0 E-MAIL NOTIFICATION OPTIONS

- 7.1** FedPayments Manager offers each FPM Customer e-mail notification options designed to generate e-mail notices about certain Messages released to the Fedwire Funds Service using FedPayments Manager and about changes to certain processing and e-mail notification options. An FPM Customer may enable and modify these e-mail notification options within one or more Service Units,

and if enabled, each e-mail notification will apply to (i) ~~Messages released through the Service Unit in which the e-mail notification option is enabled and~~ (ii) ~~the options enabled or modified in the Service Unit in which the e-mail notification option is enabled.~~

- 7.2** FedPayments Manager also offers each FPM Customer the capability to enable certain e-mail notification options ~~for Offline Messages sent by the FPM Customer~~ ~~Offline sends to the Fedwire Funds Service~~ or ~~for Online Messages it sends to the Fedwire Funds Service~~ through the FedLine Direct access solution by extending certain e-mail notification options enabled within a Service Unit by the FPM Customer as described in section 7.1 ~~of this appendix~~. An FPM Customer may only extend those e-mail notification options through a single Service Unit; if it does so, those e-mail notification options will apply to all Messages sent to the Fedwire Funds Service by the FPM Customer ~~Offline or through the FedLine Direct access solution~~ ~~using those methods~~.
- 7.3** The e-mail notices described in this section 7.0 may relate to Messages successfully processed by the Fedwire Funds Service or those rejected by the Fedwire Funds Service because the Messages violated a processing option enabled by the FPM Customer. Such e-mail notices are not Messages, and an FPM Customer may not rely on e-mail notices generated by FedPayments Manager to determine whether a Reserve Bank accepted a Message released to the Fedwire Funds Service.
- 7.4** FedPayments Manager allows FPM Customers to provide up to five e-mail addresses for each e-mail notification option. If an FPM Customer enables an e-mail notification option, the Reserve Banks will make best efforts, but are under no obligation, to send to those addresses an e-mail notification.

The Reserve Banks reserve the right to delete such Messages from time to time. In general, they will exercise that right when they are implementing changes to the FedPayments Manager application.
