Clearing Memo #226

TO: All Fedwire Book-Entry Securities Participants

SUBJECT: Additional Information on the New Functionality Available on the Fedwire® System

As announced in previous Clearing Memoranda (Numbers 219 and 220), beginning September 10, 2001 the Federal Reserve is implementing operational enhancements referred to as Fail Tracking and Interim Accounting. Detailed below is additional information related to these enhancements:

A. Interim Accounting Delay

The Ginnie Mae Conversion Task Force has decided to delay implementation of Phase II, cash adjustments, of Interim Accounting. Since Interim Accounting adjustments are not optional for senders of securities, Phase II will be delayed until Repo Tracking identifiers can be used in transfer messages. This will avoid interim accounting adjustments on securities involved in repurchase agreements. Implementation of Interim Accounting Phase I will include notifications only. Repo Tracking is scheduled to be available on February 4, 2002.

Fail Tracking is still scheduled for Phase I on September 10, 2001 and Phase II on October 1, 2001.

B. Class Codes Eligible for New Functionality

As stated in our previous clearing memoranda, the new functionality enhancements will be activated at a securities product level (class code, e.g., FMPC). Initially, this feature will be used only for Freddie Mac, Fannie Mac, and Ginnie Mae mortgage-backed securities on the Fedwire securities transfer system.

Attachment 1 lists the Freddie Mac, Fannie Mae, and Ginnie Mae mortgage-backed securities, by Issuing Agency, that are eligible for New Functionality.

® Fedwire is a registered trademark of the Federal Reserve Banks

C. Error Codes

Attachment 2 details new error codes associated with the new edits applied to the fields supporting Fail Tracking.

D. Claim Adjustments

Claim adjustments for Fail Tracking and Interim Accounting will be netted by securities account and posted to the customer's account on the Net Settlement ("NSS") line in the Account Balance Monitoring System ("ABMS") see Attachment 3.

Attachment 4 is an example of an institution's daily reserve account statement. Claim adjustments will appear in the Net Settlement section and be identified by the code "11100 NAT NET SETTLEMENT."

Adjustments will be netted by securities account and adjustment type. The "reference field" on your daily accounting reserve statement will indicate the adjustment type and securities account (e.g., ACAP-F for Fail, ACAP-I for Interim accounting adjustments).

If you are a correspondent for another institution, the adjustment type and securities account will appear in the reference field under the "respondents" activity section.

Details of the claim adjustments will be delivered the night before the adjustments are processed using the delivery option for the Immediate Principal and Interest Notifications report.

E. Historical Data

Claim adjustments related to Fail Tracking will only be made for up to 6 previous Payment Dates from the transaction settlement date. We **will** provide 6 months of historical data for Freddie Mac and Fannie Mae. For Ginnie Mae securities, we will begin building our historical database of factors in August 2001 and will eventually have 6 months of data available.

F. Beneficiary Dates

As stated in Clearing Memo #225, the Securities Description Master File will include all current CUSIP attributes plus a new field, "beneficiary date." Initially, the mortgage backed securities broadcast will not include the beneficiary date. Beneficiary date information will be distributed in a separate general broadcast message (BA1000).

We will advise you in August 2001 when we have updated the beneficiary date for applicable outstanding Freddie Mac, Fannie Mae and Ginnie Mae REMIC tranches. We will also advise you when we will begin to include the beneficiary date in a general broadcast message as new securities are issued.

As indicated in Clearing Memo #225, the Securities Description Master file is only available via bulkdata transmission.

Institutions should contact the Federal Reserve Bank of New York, telephone # (201) 531-3341, fax # (201) 531-3590 to request the SDM file and the Computer Interface Protocol Specifications (CIPS) as well as to schedule receipt of a test file(s).

G. Pricing/Fees

Due to the uncertainty of volume and activity for the new functionalities, fail tracking and interim accounting, we have decided to delay implementing fees until May 1, 2002. We currently expect our price range, applicable to each individual adjustment entry (not the net entry), to be \$.50 or less. More details on the pricing decision will be provided at the end of March 2002.

H. Message IDs and Application IDs for Bulkdata Files

The following information lists the Computer Interface Protocol Specifications (“CIPS”) Message Ids/Application IDs and names of the Book-Entry Securities reports.

Error Codes & Descriptions for Fail Tracking

The following new error messages will be added to the NBES Error Database to support the new services of fail tracking:

- I. Code: "E132"
- Short Description: MULTIPLE CNTR DATES
 - Medium Description: MULTIPLE CONTRACT DATE TAGS IN TRFER MSG
 - Long Description: MORE THAN ONE OF THE FOLLOWING VALID CONTRACT DATE TAGS IS USED IN THE FREE TEXT LINES OF A TRANSFER MESSAGE: {98A:CNTR/yyyymmdd} and/or {98A:CNTR/}.
- II. Code: "E133"
- Short Description: END DELIM NOT FOUND
 - Medium Description: CONTRACT DATE END DELIMITER NOT FOUND
 - Long Description: CONTRACT DATE TAG IN THE FREE TEXT LINES OF A TRANSFER MESSAGE DOES NOT HAVE THE "}", END DELIMITER: "{98A:CNTR/yyyymmdd" OR "{98A:CNTR/"}.
- III. Code: "E135"
- Short Description: CNTR DT INVALID FRMT
 - Medium Description: INVALID CONTRACT DATE FORMAT IN FREE TXT LN
 - Long Description: CONTRACT DATE FORMAT IS NOT = 'yyyymmdd'
- IV. Code: "E138"
- Short Description: CNTR DT_ >CURR CYC DT
 - Medium Description: CONTRACT DATE IS BEYOND SETTLEMENT DATE
 - Long Description: CONTRACT DATE MUST BE LESS THAN OR EQUAL TO SETTLEMENT DATE.
- V. Code: "E139"
- Short Description: CNTR DT NOT=CYCLE DT
 - Medium Description: NON "SM" TRANS:CNTR DT NOT = CURR CYCLE
 - Long Description: FOR NON SECONDARY MARKET TRANSACTIONS ONLY (i.e. ORIGINAL ISSUE 2500-2502, STRIP & RECON REQUESTS, BE AND/OR DEFINITIVE CONVERSION REQUESTS.

IF A CONTRACT DATE IS NOT EQUAL TO A SETTLEMENT DATE FOR NON SECONDARY MARKET TRANSACTION, THEN THE MESSAGE WILL BE REJECTED.
