TO: All Fedwire® Securities Service Participants

SUBJECT: Changes to Processing of Principal and Interest Payments and Redemptions

Beginning in July 2006, changes to the Federal Reserve Banks’ Policy Statement on Payments System Risk (PSR Policy) will become effective\(^1\). These changes will impact the processing of interest and redemption payments for securities issued by government-sponsored enterprises (GSEs) and certain international organizations (See Attachment 1 for a listing of affected organizations). Changes to the processing of interest and redemption payments will also result in a change to the manner in which security par balances are reduced.

The Fedwire Securities Service is being modified to address these policy changes.

Issuers will have the flexibility to pay holders of their securities on a flow basis with incremental payments based upon a pre-established percentage of the entire obligation. Therefore, recipients of payments from the Fedwire Securities Service may notice an increase in the number of payments and a decrease in the amount of each individual payment. Interest and redemption payments may be received beyond the secondary market close. Closing time for these payments will be specified in a subsequent clearing memo.

Changes to interest and redemption payments

A. Use of additional Funder accounts

Securities issuers currently have the ability to establish multiple funder accounts to segregate securities for interest and redemption processing. Currently, most issuers make use of one or two funder accounts – typically one for mortgage-backed securities and one for non-mortgage-backed securities. With the PSR policy change, issuers may increasingly take advantage of the use of funder accounts in order to further segregate securities and manage payment flows.

B. Incremental Payouts by Funder Account

In addition to having the ability to establish additional funder accounts, each issuer will have the ability to pre-establish payout increments (from 5% to 100%) for each of its funder accounts. The payout increments define the number of payments and the corresponding percentages that will be paid out on a flow basis. Incremental payments will be made to all holders of securities associated with an individual funder account, once the required funding for the incremental payment is available. The incremental payment

payout percentage is applied equally to all securities associated with a particular funder account.

Payments will continue to be summarized at the securities account, record date, payment date and funder level.

Information regarding the funder accounts maintained by the issuers, securities associated with the funder accounts and pre-established payout percentages will be made available in a subsequent clearing memo prior to the implementation of the changes outlined herein. Any changes to established funding patterns will be published in the form of a clearing memo.

Example:

Issuer A

<table>
<thead>
<tr>
<th>Funder Account 1</th>
<th>Funder Account 2</th>
<th>Funder Account 3</th>
</tr>
</thead>
<tbody>
<tr>
<td>Payout increment 1: 50%</td>
<td>Payout increment 1: 25%</td>
<td>Payout increment 1: 100%</td>
</tr>
<tr>
<td>Payout increment 2: 50%</td>
<td>Payout increment 2: 25%</td>
<td></td>
</tr>
<tr>
<td>Security 1 ($300K)</td>
<td>Security 3 ($300K)</td>
<td>Security 5 ($300K)</td>
</tr>
</tbody>
</table>

Funder Account 1
- Holders of securities belonging to Funder Account 1 will be paid in increments of 50%
- The incremental payment (50% of the total dollars due) will be made as soon as 50% of the total funding requirement for Funder Account 1 is met.
- This will result in 2 Fedwire Securities Service payments

Example: Total expected to be paid out of Funder Account 1 $500K
- Security 1 $300K
- Security 2 $200K
- 50% of the total to be paid out is $250K

<table>

</tr>
<tr>
<td></td>
<td></td>
<td>Security 2 - $200K</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Funder Account 2
- Holders of securities belonging to Funder Account 2 will be paid in increments of 25%
- The incremental payment (25% of the total dollars due) will be made as soon as 25% of the total funding requirement for Funder Account 2 is met.
- This will result in 4 Fedwire Securities Service payments

Example: Total expected to be paid out of Funder Account 2 $500K
Security 3 $300 K  
Security 4 $200 K  
25% of the total to be paid out is $125K

<table>

| 7.       | $100K          | $100K           |                          |                        |
| 8.       | $25K           | $25K            |                          |                        |
| 9.       | $125K          | $125K           | $75K to holders of Security 3  
$50K to holders of Security 4 |

Total: $500K  
Security 3 - $300K  
Security 4 - $200K

Funder Account 3
- Holders of securities belonging to Funder Account 3 will be paid in increments of 100%
- The entire payment (the total dollars due) will be made when 100% of the total funding requirement for Funder 3 is met.
- This will result in 1 Fedwire Securities Service payment

Example: Total expected to be paid out of Funder Account 3 $500K  
Security 5 $300 K  
Security 6 $200 K  
100% of the total to be paid out is $500K

<table>

</tbody>
</table>
| 5.       | $500K          | $500K           | $300K to holders of Security 5  
$200K to holders of Security 6 |

Total: $500K  
Security 5 - $300K  
Security 6 - $200K

C. Change to the 8906 payment message and the 8990 notification message

- The 8906 P&I payment message, and the 8990 P&I notification message will be modified to reflect the distribution of dollars directly from the issuer’s distribution account, rather than the Federal Reserve Bank of New York (routing number 021001208). (See Attachment 2.) Further information regarding distribution accounts will be published in a subsequent clearing memo.
- Payments will be made based on the increment set by the issuer, as in the examples above.
- The record date, payment date and funder will continue to appear on line 6, as it does today.

D. Change to the Principal and Interest Notification of Credit

- In order to assist security holders reconcile multiple payments per security during a single business day, the Principal and Interest Notification (Immediate ID # BA2040 and non-immediate
ID # BA2041) will be modified to show the incremental payments.

- Two new line types will be added to the report. Line type A will show the incremental payment and par amount for each CUSIP to be paid, and line type B will show the total incremental payment amount. If applicable, the Principal and Interest Notification will also include the amount that was suspended. (See Attachments 3 and 4.)

- The last increment will accommodate rounding.

E. Required funding shortfalls

In the event required funding is not fully met by an issuer for one of its funder accounts:

- We anticipate that prior day payments that have yet to be remitted will be paid before any other current payments, as soon as funding is available. This would result in the oldest obligations being paid first.

- Payout will be made using the factors reported on the original principal and interest payment notification.

Changes to redemptions of securities

As a result of implementation of incremental payouts for securities, a corresponding change will be made to the way redemptions of securities are processed.

A. Incremental redemptions

- Redemptions of maturing or paid down securities will follow the same pre-established incremental pattern as described above for each issuer. Therefore, multiple reductions may be made for a single security.

- During a single payment increment, the withdrawal of maturing or paid down securities will occur in relation to the proceeds remitted.

- A separate redemption message will be delivered for each increment.

B. Transfer of securities on maturity date or pay-down date

- Securities will not be transferable on the maturity date (or the payment date of the final pay-down.)

C. Changes to the 8900 redemption message

- The 8900 redemption message will be modified to reflect the retirement of securities directly from the issuer, rather than from the Federal Reserve Bank of New York (routing number 021001208). (See Attachment 5)

- Redemptions will be made based on the increment set by the funder.

- The redemption message will continue to be at the routing number, securities account, and security level.
Following is an example of the process flow:

<table>
<thead>
<tr>
<th>Current Processing Method</th>
<th>Proposed Processing Method</th>
</tr>
</thead>
<tbody>
<tr>
<td>Bank XYZ holds Security A for 1M par</td>
<td>Bank XYZ holds Security A* for 1M par</td>
</tr>
