Revised July 1, 2020 - Attachment 2's for FHLBanks and Farm Credit

Original Date May 17, 2006

Clearing Memo #250

TO: All Fedwire® Securities Service Participants

SUBJECT: Implementation of Changes to Processing of Principal and Interest Payments and Redemptions

On July 20, 2006, changes to support the Federal Reserve Banks' Policy Statement on Payments System Risk (PSR Policy) will become effective¹. These changes will impact the processing of interest and redemption payments for securities issued by government-sponsored enterprises (GSEs) and certain international organizations. Changes to the processing of interest and redemption payments will also result in a change to the manner in which security par balances are reduced. (Please refer to Clearing Memo #247 for a detailed description of these changes.)

To prepare for this policy change, there are several changes that are being implemented prior to July 20th, as well as some *temporary* changes to the timing of when you will receive your P&I Notification of Credit Reports beginning in late June. Additional information on these changes is detailed below:

Changes to Principal and Interest Payment Messages using Funder Increments

You will begin to see changes to your payment messages on Monday, July 3, 2006. Payments will be made in the increments established for each issuer and funder account (see Attachment 2). Although payments will be made in increments, from July 3rd until July 19th all incremental payments will be released at the opening of the Fedwire Securities Service regardless of whether there are available funds in the appropriate funder accounts. This time period will provide your institution with an opportunity to become familiar with reconciling incremental payments.

Beginning Thursday July 20th, the PSR Policy will become effective. Payments will be released on a flow basis in increments as funding is received. Your institution should be prepared to receive and reconcile multiple payments at various times throughout the business day. Payments will be released beginning between 8:00 am and 8:30 am ET and continue through out the day up until 4:30 pm ET.

These incremental payments apply to the following three securities type code messages:

<u>Securities Type Code</u>	<u>Transfer Message Type</u>
8906	Payment message
8990	Correspondent message about a payment (non-value)
8900	Redemption / Maturity message

¹ For details on the changes to the Federal Reserve's PSR Policy, see the press release dated September 23, 2004, available at <http://www.federalreserve.gov/paymentsystems/psr/press.htm>

Changes to P&I Notification of Credit Reports (Immediate and non-Immediate)

With P&I payments beginning in July 2006, as described in Clearing Memo #247, the P&I Notification of Credit Reports (for immediate and non-immediate P&I) are being modified. Two new line types showing the incremental payment and par amount for each CUSIP to be paid, and the total incremental payment amount will be added.

There are two **temporary** changes to the timing of these reports that are necessary leading up to the effective date of the policy.
