## Changes to Check Adjustment Case Requirements and Edits

To all Check Adjustment Customers:

As previously announced, the Federal Reserve Banks are making changes to Check Adjustment requirements and edits to eliminate several investigation types (ITYPs) and two message types (MTYPs) that are outdated and have minimal usage. In addition, there will be a new deadline for receiving same day entry or same day acknowledgement for electronic adjustments submitted via the FedLine Web<sup>®</sup> and FedLine Advantage<sup>®</sup> access solutions. **These changes will become effective for the business day of May 22, 2017.**

The changes will be reflected in the online [Check Adjustments Quick Reference Guide](#) on the effective date.

### ***What does this mean to you?***

- The 11 ITYPs listed below will be retired. If a retired ITYP is submitted in an electronic adjustment file, the file will upload successfully; and the individual message will reject, allowing the message to be corrected from the Outbox-Unsent/Rejects feature in the Check Adjustments application. FedLine<sup>®</sup> messages for retired ITYPs will remain viewable after the effective date, but no new cases can be sent to or from the Federal Reserve Banks.
  - Advice Request (AREQ)
  - Enclosed Not Listed (ENL)
  - Expedited Recredit (EXRC)
  - Extra Bundle (EBDL)
  - Extra Cash Letter (ECL)
  - Extra Cash Letter Credit (ECLC)
  - Free Item (FREE)
  - Incorrect Cash Letter Credit (ICLC)
  - Late Cash Letter Credit (LCLC)
  - Listing Error (LST)
  - Missing Bundle (MBDL)
- Two MTYPs, Status Inquiry (CA4000) and Status Inquiry Response (CA6000) will be retired. If a file containing a message with a retired MTYP is uploaded using the FedLine access solution, the file will upload successfully and the message(s) with the retired MTYP(s) will be rejected. The [Check Adjustments Automated Status Report](#) will continue to be available as a menu option under the Import/Export feature in the Check Adjustments application. This report identifies the status of cases pending with the Federal Reserve Banks.
- Documents-to-follow (DTFs) will become Not Allowed for the Encoding Error (ENC) ITYP.
- The deadline for Check Adjustments submission to the Federal Reserve Banks for same day entry or acknowledgement will change to 5:00 p.m. ET.
- A table describing all the changes above and additional changes to various edit routines is included with this letter.

An updated [Check Adjustments Application File Specifications Requirements document](#) reflecting these changes is posted on FRBServices.org for customers submitting adjustment requests using the file upload process in a FedLine access solution.

Contact FedACH<sup>®</sup> and Check Customer Support at (877) 372-2457 with any questions as well as to schedule testing for upload files.
