

Revisions to Certification Practice Statements

Effective July 8, 2014, the Federal Reserve Banks are making a technical amendment to each of their Certification Practice Statements as follows:

The ***Federal Reserve Banks' Certification Authority (FR-CA) Certification Practice Statement*** is being revised by adding "at least" to the following sentence in Paragraph 6.0, *Technical Security Controls*: "Subscribers are required to use private key/public key pairs that are at least 1024 bits long."

The ***Certification Practice Statement of the Federal Reserve Banks' Services Public Key Infrastructure*** is being revised by adding "or other organization identification number such as the Research, Statistics, Supervision and Discount (RSSD) number" to the value description of the Organizational Unit attribute in Paragraph 3.1.1, *Types of Names*.
