General Information

The Federal Reserve System's Reporting Central Application provides the ability for a reporting entity to submit their reports electronically through the use of an XML file. This document describes the required format for creating the XML file for the FFIEC030 (Foreign Branch Report of Condition) report.

How the XML File Is Structured

Each XML file contains financial data for one reporting entity and asof date. The data in the file is organized into the following sections.

- Reporting File
 - Create date
 - Create time
- Report
 - Respondent Id
 - As Of Date
 - Series Id
- Item Data
 - Optional context used for data in a variable schedule (such as the FFIEC 030 *List of Consolidated Branches*)
 - Value

XML structure or schema:

Reporting File is a wrapper that encapsulates all the data in the file; it must include the create date and time of the file.

Report is a wrapper that encapsulates all the data items; it must include attributes to identify the respondent Reporter Id, the report As of Date, and the report Series Id.

Item Data is a wrapper that encapsulates the report data values for the reporting entity and as of date.
