

MOP 15

Custodial Inventory Site Video Recording System Attestation

By signing this form, the institution named below certifies that the video monitoring equipment that will be used in the proposed Custodial Inventory location will meet the following minimum standards:

1. High quality resolution - must be able to clearly see and identify staff handling CI inventory.
2. Recording must be at least two frames per second.
3. The video system must retain and playback continuous smooth and uninterrupted recordings. If motion sensing technology is used, it must capture all activity associated with the Custodial Inventory currency.

This recording requirement will allow for playback of clear and uninterrupted images of activity as it relates to the Custodial Inventory vault.

Institution Name: _____

CI Location: _____

Authorized OAL Signature: _____

Print Name and Title: _____
